

NOVEMBER 2025 / IMMIGRATION RESEARCH INITIATIVE

50 States: Immigrants by Number and Share

There are 50 million immigrants in the United States, making up 15 percent of the overall population. This includes all people who are living in the United States and were born in another country, irrespective of immigration status.

Around the country, the share of immigrants in the population varies from two percent in West Virginia to 28 percent in California. Below is a table to show where your state fits in.

This table also shows the number of non-citizens. Nationally, about half (51 percent) of all immigrants are naturalized citizens, and about half (49 percent) are non-citizens immigrants.

The three leading sources of data about immigrants who are unauthorized—Center for Migration Studies, Pew Research Center, and Migration Policy Institute—all estimate that of the 24 million immigrants who are not, or not yet, citizens, about half are unauthorized. It is important to note that among people who are unauthorized are a very significant number who the government has given some protection from deportation.

At the national level, the estimates of immigrants who are unauthorized range from 12.2 to 14.0 million. The table below shows the range of estimates state by state.

Note that we cannot simply divide the number of undocumented to get a precise undocumented share, since the methodologies for estimating the number of immigrants who are undocumented includes an adjustment for their undercount in the Census Bureau surveys.

IMMIGRANTS BY STATE AND POPULATION SHARE

Rank by Immigrant Percent of Population	State	All Immigrants ACS 2024			Immigrant Share of Population ACS 2024	Non-Citizen Immigrants ACS 2024	Number of Immigrants Who Are Unauthorized: 3 Estimates		
		U.S.-Born ACS 2024	U.S.-Born ACS 2024	Immigrant Share of Population ACS 2024			1. Center for Migration Studies 2023	2. Pew Research Center 2023	3. Migration Policy Institute Mid 2023

Sources: All immigrants, U.S.-born, total population, and non-citizen immigrants come from Immigration Research Initiative analysis of the 2024 American Community Survey. The three estimates of immigrants who are unauthorized come from the [Center for Migration Studies](#), [Pew Research Center](#), and [Migration Policy Institute](#). CMS and Pew analyses are developed from the 2022 American Community Survey data. The MPI estimate is based on the pooled 2019-23 American Community Survey (ACS) and the 2023, 2022, and 2008 Survey of Income and Program Participation (SIPP), weighted to 2023 unauthorized immigrant population estimates provided by Jennifer Van Hook of The Pennsylvania State University.

Recent Trends

The Pew Research Center explains that “the label ‘[unauthorized immigrants](#)’ captures a complex array of statuses, including immigrants who entered the U.S. legally. While the label is not perfect, it groups together immigrants living in the country with impermanent, precarious statuses.”

[This Pew report](#) looks at recent trends, and shows a sharp increase in the number of people who are unauthorized that coincided with humanitarian crises around the world and pent-up demand at the end of the Covid pandemic.

A SHARP RECENT INCREASE, WITH OVER 40% HAVING SOME PROTECTION FROM DEPORTATION

... due to an increase of unauthorized immigrants with some protection from deportation

Unauthorized immigrant population in the U.S., in millions

	Total <u>without</u> protection from deportation	Total <u>with some</u> protection from deportation	
2023	8.0	6.0	14.0
2022	7.7	4.0	11.8
2021	7.7	2.7	10.5
2019	7.7	2.5	10.2
2007	11.7	0.5	12.2

Note: In the top panel, shading shows the range of the estimated 90% confidence interval. The data points labeled are 1990, 1995, 2000, 2007 (previous peak), 2015, 2019, 2021, 2022 and 2023.

^{“U.S. Unauthorized Immigrant Population Reached a Record 14 Million in 2023”}

Source: [Pew Research Center analysis](#) by Jeffrey S. Passel and Jens Manuel Krogstad

The big change in immigration was a large increase in the number asylum seekers, people granted humanitarian parole, and others who government policy gave some degree of protection from deportation. Of the 14 million immigrants Pew estimates were unauthorized as of 2023, six million—43 percent—had some protection from deportation.
